

# ELECTROMAGNETIC RADIATION

HOW TO PROTECT YOURSELF, FAMILY, FRIENDS, AND PETS

# What is Electromagnetic radiation?

Electromagnetic Fields or Electromagnetic radiation is all around us. You can't get away from it. Every wireless device and every antenna are responsible for "Electrosmog."

These devices can never be used without EMR—not cell towers, cell phones, Wifi, Bluetooth and not any of the 25 different wireless devices owned by the average household today.

# 5 Things to Remember about EMR

01

It's everywhere. Anything plugged into an outlet or running on batteries produces EMR, as well as highline wires, cell towers and satellites.

02

Some studies claim it may destroy mitochondria and could cause cancer

03

Studies show it may also cause memory loss, anxiety, depression, heart problems and destroys our biofield.

04

With all the cell towers and satellites, scientists fear it may get worse.

05

EMR is not going away and we have to learn how to protect ourselves.

# Why use GIA wellness products?

GIA products only shield our devices, and does not block the signal.

If we interfere with the signal it could possibly cause more radiation, because the device has to work harder to get a strong signal.

They are an inexpensive way to protect our health.

Made in America

Been in business since 2004 and have been researched and tested by many doctors and scientists.

# Why use GIA wellness products?

Gia wellness has 2 technologies that no one else has:

**ERT (Energy Resonance Technology)**

**&**

**MRET (Molecular Resonance Effect Technology)**

These 2 technologies focus on changing the way the body responds to EMR.

Here's a simple example: Sunscreen doesn't make the sun go away, but it changes the way the body responds to it. GIA's technologies uses the same basic principle. Our devices don't make EMR disappear. Instead, they measurably change the body's response to EMR, a patented game-changer.

# **GIA WELLNESS PRODUCTS AND WHY WE NEED THEM**

# Cell Guard

Why do we need protection from cell phones?

There are 15 billion cell phones on earth today along with 6 million cell towers and at least 5000 satellites in space, with at least 100,000 more being scheduled for construction.

Want to know how many cell towers and antenna are near your home? Go to [www.antennasearch.com](http://www.antennasearch.com) and put in your address to look for antennas.

# 5 Reasons to use a Cell Sliver, Cell Sliver Plus or Cell Phone Case

01

No cell phone is safe. Cell slivers work on cell phones, smart phones and Bluetooth. We also have cell phone cases for most smart phones.

02

Designed to neutralize the effects of your continual exposure to EMR, while supporting the body's resilience to stress at the same time.

03

Only patented product of its kind in the world.

04

Made in the USA by a Military Defense Contractor.

05

Not available in stores - only get them from Full Circle Health or The Third Opinion

Make a record of when you purchased your protection, so you can replace them at the correct time. They cannot be moved from one phone to another, unless it's the same model.

Cell Sliver - 1 year

Cell Sliver Plus - 1.5 years

Cell case - 2 years

Don't use earbuds without GIA'S mini decals because you are now an antenna. Don't be one of the 55 million AirPods users who are not protected!!!

**DON'T CHARGE YOUR PHONE NEAR WHERE YOU SLEEP!!**

# Universal Guard

Universal Guards are used on everything else including smart meters, routers, cable modems, cordless phones, microwave ovens, refrigerators, hairdryers, etc.

# 5 Reasons to Use Universal Guards

01

Most homes have approximately 25 different wireless devices now, which all give off EMR

02

They are universally programmed, allowing use on multiple devices, both wired and wireless. Cannot move from 1 device to another.

03

Designed to assist in alleviating the cumulative stress associated with living in today's electronic & wireless environment.

04

Resilient & long-lasting -- 3 years

05

Inexpensive

# GIA Life Pendant

It's a personal protection for you, so don't let others use it.

After 2 hours it sets to your personal frequencies.

# 5 Reasons to Use a GIA Life Pendant

01

Supports mental & physical performance, especially when under pressure. In other words, it helps you stay calm.

02

8 out of 10 people say that when using the pendant, they feel significantly less stressed and much more balanced.

03

Supports natural energy while keeping you calm.

04

In a small double-blind study of 32 individuals when tested against the Q-Link, 6% tested better when compared using a heart rate variability test, it showed the patent to have a heart 10 years younger than when tested with the Q-Link.

05

One-time purchase

# Home Harmonizer

Powered by ERT to help reinforce your body's natural resilience to the effects of everyday stress in your home, office or while traveling.

Designed to cover a 60-foot radius.

Uses no electricity, plug into your wall outlet (for bio-energetic reasons not for power) & you're ready to go.

One-time purchase

Helps protect your family and pets from 5g, dirty electricity & background radiation. Does not take place of any other product. Just another layer of protection.

# Car Harmonizer

On average, we drive a staggering 540 hours each year, and our cars now have several computers in them.

Battery-powered hybrid cars and all-electric cars present an even bigger concern, emitting significant amounts of disruptive frequencies.

# 5 Reasons to Use a Car Harmonizer

An effective way to reinforce your body's natural resilience to the effects of electropollution exposure.

Features universal charger for multiple hand-held electronic devices

Works as a flashlight

Has a solar charger & comes with 2 cables & 3 universal adapters.

Has a decal which needs to be replaced every 2 years, but only the decal needs to be replaced. So, it's effective and inexpensive protection.

# Smart Card

A pocket-size card that you can use with nutritionals, juices, tea, coffee, water, milk, wine, and various foods.

# 5 Reasons to Use a Smart Card

Powered by GIA's proprietary energy resonance technology. It is designed to transfer its vital energy onto any food or beverage.

It's credit card size and easy to use. 5 minutes for liquid; 10 minutes for solids.

One-time purchase

Makes your nutritionals bioavailable and helps them go to work immediately.

Lemon test: Will it decrease your alkalinity? You decide.

Cut a lemon in  $\frac{1}{2}$ . Place  $\frac{1}{2}$  on the smart card and the other half on a plate. Wait 10 minutes. Taste the lemon wedge on the Smart card and then compare it with the other half.

# Where do you start your personal protection?

- Protect your cell phone with a cell sliver or a cell phone case.
- Put 2 Universal Guards on each smart meter: electricity, gas, and some water meters.
- Put 2 Universal Guards on modems, Wi-Fi router boxes, and extended router boxes.
- Put 2 Universal Guards on your microwave, if you still use one
- Put 1 Universal Guard on your laptop computer or iPad
- Put 2 Universal Guards on each television.
